Funding

Development of the Energy ADE 2.0 has started in spring 2024 within the European DigiTwins4PEDs project, as part of Work Package 3. The project is funded by the European Commission under the Horizon Europe Partnership scheme. The DUT Call 2022 also contributes to the Urban Transition Mission of Mission Innovation as part of the MICall 2022 initiative.

Acknowledgements

The author would like to thank the following people for their suggestions and fruitful discussions that have helped design the current version of the Energy ADE:

- Rushikesh Padsala and Zhihang Yao (HFT Stuttgart, Germany)
- Thomas Kolbe (TU Munich, Germany)
- Jérôme Kämpf (Idiap, Switzerland)
- Camilo León-Sánchez (TU Delft, The Netherlands)

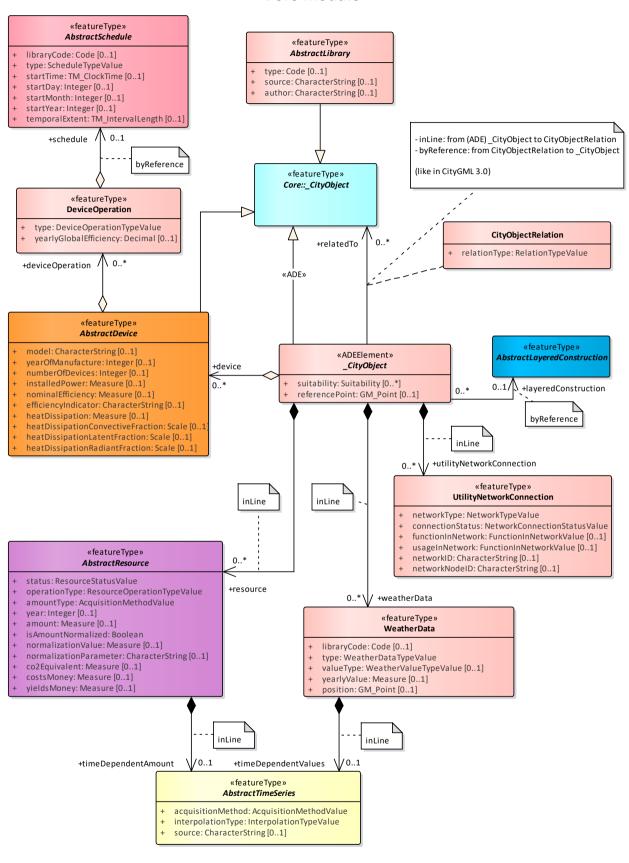

Particular gratitude is due to Daniele Gasparini for designing the Energy ADE logo.

Changelog

Version 2.0 beta 7

2025-06-25

Schedules package:

- Class ScheduleLibrary
 - Changed relation type of *libraryMember* to composition

Layered Construction package:

- Class LayeredConstructionLibrary
 - Changed relation type of libraryMember to composition
- Class LayeredConstruction
 - Added property gValue
- Class MaterialLibrary
 - Changed relation type of *libraryMember* to composition

2025-05-30

Schedules package:

- Class AtomicSchedule
 - Changed multiplicity of relation timeSeries to [0..1]
 - Added property constantValue

2025-05-13

Building physics package:

- Class ThermalZone
 - Changed relation type of thermalBoundary to composition

2025-05-07

Core package:

- Class ADE CityObject
 - Changed relation type of *device* to aggregation
 - Changed relation type of weather Data to composition
- Class AbstractThermalZone
 - Changed relation type of usageZone to association
- Class AbstractUsageZone
 - Changed relation type of building Unit to association
- Class AbstractResource
 - Made relation to AbstractTimeSeries explicit and set to composition
- Class DeviceOperation
 - Made relation to AbstractSchedule explicit and set to aggregation
- Class WeatherData
 - Made relation to **AbstractTimeSeries** explicit and set to composition

Occupancy package:

- Class UsageZone
 - Changed relation type of *occupiedBy* to aggregation
 - Made all relations to **AbstractSchedule** explicit and set to aggregation
- Class BuildingUnit
 - Changed relation type of *occupiedBy* to aggregation
- Class Occupants
 - Made relation to AbstractSchedule explicit and set to aggregation

Layered Construction package:

- Class LaveredConstruction
 - Changed relation type of *layer* to composition
- Class Layer
 - Changed relation type of *material* to aggregation

Schedules package:

- Class ScheduleComponent
 - Changed relation type of *scheduleComponentMember* to aggregation

2025-05-01

Core package:

- Class ADE _AbstractSchedule
 - Moved from package Schedules to Core
- Class ADE _AbstractTimeSeries
 - Moved from package Time Series to Core

Occupancy package:

- Class Occupants:
 - Added property averageDietType
 - Added property averageIncomeLevel
 - Added property averageInstructionLevel

CodeLists package:

- Added class DietTypeValue
- Added class InstructionLevelValue
- Added class IncomeLevelValue

2025-04-23

CodeLists package:

- Added values to class AreaTypeValue
- Renamed class HeightReferenceValue to HeightTypeValue
- Added class SuitabilityReasonValue
- Added class UrbanSpaceTypeValue
- Added class UrbanSpaceEndUseValue

DataTypes package:

• Added class Suitability

Core package:

- Class ADE CityObject
 - Added property suitability
- Class ADE _AbstractBuilding
 - Renamed property bdgFloorArea to bdgArea
 - Renamed property bdgHeightAboveGround to bdgHeight
- Class AbstractBuildingPartition
 - Renamed property floorArea to area

Resources package:

• Added class UrbanSpace

2025-04-12

Core package:

• Added class AbstractLibrary

Layered Construction package:

- Added class LayeredConstructionLibrary
- Added class MaterialLibrary

Schedules package:

• Added class ScheduleLibrary

CodeLists package:

• Class FunctionInNetwork renamed to FunctionInNetworkValue

Version 2.0 beta 6

2025-02-06

DataTypes package:

- Dropped class HeatExchangeType
- Dropped class OpticalProperties

Core package:

- Class ADE _CityObject:
 - Renamed property from operationSchedule to deviceOperation
- Class AbstractDevice:
 - Changed type of property heatDissipation to gml:Measure
 - Added property heatDissipationConvectiveFraction
 - Added property heatDissipationLatentFraction
 - Added property heatDissipationRadiantFraction

Occupancy package:

- Class UsageZone:
 - Renamed property averageInternalGains to internalGains and changed type to gml:Measure
 - Added property internal Gains Convective Fraction
 - Added property internal Gains Latent Fraction
 - Added property internal Gains Radiant Fraction
- Class Occupants:
 - Changed type of property heatDissipation to gml:Measure
 - Added property heatDissipationConvectiveFraction
 - Added property heatDissipationLatentFraction
 - Added property heatDissipationRadiantFraction

Layered Construction package:

- Class LayeredConstruction:
 - Dropped property optical Properties
 - Added property *glazingRatio*
 - Added property emissivity
 - Added property reflectance
 - Added property transmittance
- Class Layer:
 - Changed multiplicity of property thickness to [1]
- Class AbstractMaterial:
 - Added property libraryCode

| Version 2.0 beta 5 | |
|--------------------|--|
| | |

Resources package:

No changes since beta 4

Weather Station package:

No changes since beta 4

2025-01-30

Packages

- Created TimeSeries package and moved all related classes into it
- Created Schedule package and moved all related classes into it
- Dropped Supporting classes package

CodeLists package:

• Class CertificateTypeValue renamed to EnergyPerformanceCertificateTypeValue

2025-01-28

CodeLists package:

Added class ScheduleTypeValue

Enumerations package:

• Dropped class DayTypeValue

Supporting classes package:

- Dropped class TimeSeriesSchedule
- Dropped class DailyPatternSchedule
- Dropped class PeriodOfYear
- Dropped class DailySchedule
- Added class AtomicSchedule
- Added class CompositeSchedule
- Added class ScheduleComponent
- Class AbstractSchedule:
 - Added properties type, startTime, startDay, startMonth, startYear, temporalExtent

2025-01-22

Devices package:

- Class AbstractSolarCollector:
 - Added properties azimuth and inclination
 - Dropped property *surfaceGeometry*
 - Added properties lod2MultiSurface and lod3MultiSurface

2025-01-13

CodeLists package:

- Dropped class ThermalBoundaryTypeValue
- Added class ShadingDeviceTypeValue
- Added class WeatherValueTypeValue

DataTypes package:

- Moved class PeriodOfYear from package DataTypes to Supporting classes
- Moved class DailySchedule from package DataTypes to Supporting classes
- Class AbstractQualifiedAttribute:
 - Added properties source and value
- Classes QualifiedHeight, QualifiedArea, QualifiedVolume:
 - Dropped property *value*

Supporting classes package:

Class AbstractTimeSeries:

- Moved back from package Core to Supporting classes
- Changed multiplicity of property acquisitionMethod to [1]
- Changed multiplicity of property *interpolationType* to [1]
- ClassTypicalValuesTimeSeries:
 - Added properties startTime, startDay, startMonth
- Class TypicalValuesTimeSeriesFile:
 - Added properties startTime, startDay, startMonth
- Added class DualValueSchedule:
- Class PeriodOfYear:
 - Changed stereotype from dataType to featureType
 - Added properties startDay, startMonth, endDay, endMonth
 - Dropped property period
- Class DailvSchedule:
 - Changed stereotype from dataType to featureType
 - Added property repetition
 - Renamed property from schedule to timeSeries

Layered Construction package:

- Added class ReverseLayeredConstruction
- Dropped class LayerComponent
- Class Layer:
 - Removed property layerComponent
 - Added property thickness
 - Added property material
- Class SolidMaterial:
 - Renamed property from specificHeat to specificHeatCapacity
 - (Re)added and renamed property from conductivity to thermalConductivity
 - (Re)added property embodiedEnergy
 - (Re)added property embodiedCarbon
 - (Re)added property porosity

Core package:

- Class AbstractDevice:
 - Class is renamed from **AbstractEnergySystem** to **AbstractDevice**
 - Added property heatDissipation
 - Added property operationSchedule
 - Added property efficienctIndicator
 - Added property installedPower
 - Added property nominalEfficiency
- Class AbstractTimeSeries:
 - Moved back from package Core to Supporting classes
- Class (ADE) _CityObject:
 - Renamed property from energySystem to device
- Class OperationSchedule:
 - Moved from package Devices to Core
- Class WeatherData:
 - Renamed property from timeseries to timeDependentValues
 - Renamed property from single Value to yearly Value
 - Renamed property from singleValueType to valueType
 - Changed type of property valueType from CharacterString to CodeList
- Added class AbstractBuildingPartition
- $\bullet \quad Classes \ Abstract Building Unit, \ Abstract Usage Zone, \ Abstract Thermal Zone$
 - Changed parent class

Building physics package:

- Dropped class ThermalBoundary
- Dropped class ThermalOpening
- Class ThermalZone
 - Removed property *floorArea* (now inherited via **AbstractBuildingPartition**)

- Removed property volume (now inherited via AbstractBuildingPartition)
- Removed property volumeGeometry (now inherited via AbstractBuildingPartition)
- Removed property boundedBy
- Added property heatCapacity
- Added property coincides WithLod2Hull
- Added property coincidesWithLod3Hull
- Added property thermalBoundary
- Added class PartyWallSurface
- Added class BasementCeilingSurface
- Added class IntermediateFloorSurface
- Added class AtticFloorSurface
- Class (ADE) BoundarySurface:
 - Renamed property from bdgBdrySrfWindowToWallRatio to bdgBdrySrfOpeningToSurfaceRatio
 - Renamed property from bdgBdrySrfArea to bdgBdryTotalSurfaceArea
 - Added property bdgBdryOpaqueSurfaceArea
 - Added property bdgBdrySrfThickness
 - Added property bdgBdrySrfHeatCapacity

Occupancy package:

- Dropped class AbstractFacilities
- Dropped class **DHWFacilities**
- Dropped class LightingFacilities
- Dropped class Electrical Appliances
- Dropped class GenericFacilities
- Class BuildingUnit:
 - Removed property *floorArea* (now inherited via **AbstractBuildingPartition**)
 - Removed property *volume* (now inherited via **AbstractBuildingPartition**)
 - Removed property equippedWith
- Class UsageZone:
 - Removed property *floorArea* (now inherited via **AbstractBuildingPartition**)
 - Removed property *volume* (now inherited via **AbstractBuildingPartition**)
 - Removed property volumeGeometry (now inherited via AbstractBuildingPartition)
 - Removed property equippedWith

Devices package:

The former EnergySystems package is renamed to Devices package

- Class OperationSchedule:
 - Moved from package Devices to Core
- Dropped class AbstractEnergyConversionSystem
 - Now all subclasses are derived directly from AbstractDevice
- Dropped class AbstractStorageSystem
 - Now all subclasses are derived directly from AbstractDevice
- Class GenericDevice:
 - Renamed from class GenericEnergyConversionSystem
- Class ElectricalStorageDevice:
 - Renamed from class PowerStorageSystem
- Class ThermalStorageDevice:
 - Renamed from class ThermalStorageSystem
- Class AbstractSolarCollector:
 - Renamed from class AbstractSolarEnergySystem
- Class PhotovoltaicThermalCollector:
 - Renamed from class **PhotovoltaicThermalSystem**
- Class PhotovoltaicCollector:
 - Renamed from class PhotovoltaicSystem
- Class SolarThermalCollector:
 - Renamed from class SolarThermalSystem
- Class GenericSolarCollector:
 - Renamed from class GenericSolarEnergySystem
- Added class LightingDevice

- Added class GenericElectricalDevice
- Added class MovableShadingDevice

Urban Function Areas package:

- Class UrbanFunctionArea:
 - Removed property rank

Version 2.0 beta 4

2024-09-25

- Codelist ThermalBoundaryTypeValue
 - Renamed outerWall to exteriorWall
 - Renamed intermediaryFloor to intermediateFloor

2024-09-20
