Funding

Development of the Energy ADE 3.0 has started in spring 2024 within the European **DigiTwins4PEDs** project (DUT call 2022), co-funded by the European Commission under the Horizon Europe Partnership scheme. Development is now continuing within the project **RenoDAT**, funded by the Dutch Research Council, and the European project **FlexPED** (DUT call 2024), co-funded by the European Commission under the Horizon Europe Partnership scheme.

Driving Urban
Transitions

Co-funded by
the European Union

Since 2025, several other partners have joined on a volunteer basis as contributors, early testers or technology enthusiasts, who further develop the Energy ADE as a joint, open project.
